

Billy Goat Bridge Building

STEM Activity

Method

1. Tell the children that the goats need a new bridge to cross over the river so that the troll doesn't scare them.
2. Can they help by making a bridge for the goats?
3. They can only use the materials and tools that you have left out for them.
4. Look at the photos of bridges and talk about the different shapes and how the bridges go across the water.
5. The children can then decide how to join the materials to create their bridges.
6. Once the children have made their bridges, they could be tested to see if they are strong enough to support the goats as they cross the river.

You will need:

A selection of card and paper

Cardboard tubes and boxes

Children's scissors

Sticky tape

Sticky tack

String

Small goat toys

Types of Bridges Display Photos
