

Growing Green Grass

Science Experiment

Method

1. Briefly review the story of 'The Three Billy Goats Gruff'. Ask the children what the goats like to eat – green grass.
2. Tell the children that we are going to grow some grass for the goats to eat.
3. Show the children the grass seeds and ask them what they think the seeds need to grow.
4. Plant some seeds into different pots and place in different conditions e.g. in a sunny place with water, in a sunny place without water, somewhere dark etc.
5. Encourage the children to see what happens to the grass seeds over the next few days.
6. Once some of the grass seeds have grown, look again at all the pots and decide which ones the goats would like to eat and why. Discuss the best conditions for growing the seeds.

You will need:

'The Three Billy Goats Gruff' storybook

Grass seeds

Small trays or pots

Soil

Water
