

## 7 Music Video:

Date: \_\_\_\_\_

Name: \_\_\_\_\_

Just when you think you're finished, there's 1 final challenge left... making the music video!

You've practised, performed 'live' and recorded your debut single. Now you need to choreograph a dance or a set of actions to go with it.

You should try and have some structure to the dancing by linking parts of the choreography to the lyrics or beat of the song. That's all there really is to it - no other conditions!

You could play your song in the background when you record the music video so that you can focus just on the dancing rather than the singing/playing too! Don't forget to record the whole of your music video so that we can share and watch them at a later date.

When you have finished, please email the following to me:

- A 5 or 6 second clip of you dancing to your song, in costume!  
If the clip is any longer than this, then it won't send as an email.

As with your 'live' performance clips, hopefully I will be able to put these video clips together to showcase what you've all made! If all goes well, it will appear on our Class page on the website when the project is over!
