

## Column Addition Worked Examples

Please find below a few worked examples of the method for Column Addition.

For all of these calculations, you must begin by writing out the calculation so that the columns are lined up according to their place value:

Hundreds, Tens, Ones                      HTO

Hundreds, Tens, Ones                      HTO

Don't forget the '+' and the giant '=' !

$$\begin{array}{r} 231 \\ + 442 \\ \hline 673 \end{array}$$

1. Start by adding the ONES first.
2. Next, add the TENS.
3. Then, add the HUNDREDS.

$$\begin{array}{r} 136 \\ + 327 \\ \hline 463 \\ + \end{array}$$

1. Start by adding the ONES first. If there are more than 10 Ones, then exchange 10 Ones for 1 Ten (mark this as shown).
2. Next, add the TENS. Don't forget to count the Ten you exchanged (put a line through it when you have counted it!)
3. Then, add the HUNDREDS.

$$\begin{array}{r} 382 \\ + 126 \\ \hline 508 \\ + \end{array}$$

1. Start by adding the ONES first.
2. Next, add the TENS. If there are more than 10 Tens, then exchange 10 Tens for 1 Hundred (mark this as shown).
3. Then, add the HUNDREDS. Don't forget to count the Hundred you exchanged (put a line through it when you have counted it!)

$$\begin{array}{r} 194 \\ + 407 \\ \hline 601 \\ + + \end{array}$$

1. Start by adding the ONES first. If there are more than 10 Ones, then exchange 10 Ones for 1 Ten (mark this as shown).
2. Next, add the TENS. Don't forget to count the Ten you exchanged (put a line through it when you have counted it!) If there are more than 10 Tens, then exchange 10 Tens for 1 Hundred (mark this as shown).
3. Then, add the HUNDREDS. Don't forget to count the Hundred you exchanged (put a line through it when you have counted it!)
